Arnold Schwarzenegger
Governor

August 23, 2006

Dear Sir or Madam:

The California Air Resources Board (ARB) staff invites you to participate in a public workshop to discuss the rulemaking status of ARB's effort to set emission standards for gasoline dispensing facility (GDF) fuel hoses.

The workshop will be held at the date, time, and location listed below:

Date: September 28, 2006

Time: 10:00 a.m. to 12:00 p.m.

Place: Air Resources Board
MLD North and South Conference Rooms
1927 13th Street
Sacramento, California 95814

It is estimated that GDF fuel hoses emit between one and six tons per day of hydrocarbons into California's atmosphere. Applying permeation standards to this category of equipment is expected to significantly reduce emissions. We welcome your participation in this rulemaking effort.

The meeting location is accessible to persons with disabilities. If you have special accommodation or language needs, please contact Elizabeth Mongar at (916) 327-0900 as soon as possible. TTY/TDD Speech-to-Speech users may dial 7-1-1 for the California Relay Service.

The workshop agenda may be found on the web at <http://arb.ca.gov/vapor/gdfhe/gdfhe.htm>. Previous work that ARB staff has done on this subject, that may be covered at the workshop, is located on the web at <http://arb.ca.gov/vapor/gdfhe/gdfhearchive.htm>. If you have general questions regarding the workshop, or you cannot attend and would like to provide comments or participate by teleconference, please contact Jason McPhee, Air Resources Engineer, at (916) 322-8116 or via email at jmcphee@arb.ca.gov.

Sincerely,

Manjit Ahuja, Chief
Stationary Source Testing Branch
Monitoring and Laboratory Division

*The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption.
For a list of simple ways you can reduce demand and cut your energy costs, see our website: <http://www.arb.ca.gov>.*
